Our Process Advantage over Competition

Others

Our's **CONFIDENT SURE**
SCAN PLAN PRINT SEND

Collect the patient anatomy digitally using an intraoral scanner

Import the scan data into custom Dental CAD software, where tooth movements.

The created 3D model fed into the 3M3D slicer software and the aligners printed directly in 3M3D DigiDenture Printer using Memory shape Special resin.

No cumbersome milling, grinding, polishing, or thermoplastic processes required. Simply print, clean, and send to the patient

Our Product Advantage over Competition

Advantages	3M3D's CONFIDENT SURE	RejovéAligners toothsi snazzy Competition Thermoplastic Process Aligners
	Direct 3D Print Clear Aligners	
Aligner Thickness Customization	Adjustable Thickness for Specific Areas	Uniform Thickness Throughout
Precision in Treatment	Targeted Adjustments for Efficient Results	Limited Precision in Certain Corrections
Treatment Time	Potentially Shorter Treatment Duration	Longer Treatment Time Due to Constraints
Innovative Material Choices	Diverse Range of Bio-Compatible Resins	Limited Material Options
Adaptability to Complex Cases	Effective for Varied and Complex Corrections	Limitations in Complex Cases
Fine-Tuned Orthodontic Force	Precise Force Application in Specific Areas	Uniform Force Application Throughout
Reduced Irritation Potential	Smooth, Customized Fit for Comfort	Potential for Irritation Due to Constraints
Advanced Technology Integration	Integration with State-of-the-Art 3D Printing	Limited Technological Integration
Flexible Treatment Planning	Tailored Plans for Patient-Specific Needs	Adaptable but Limited in Certain Corrections

3M3D's CONFIDENT ALIGN clear aligners exhibit a range of advantages over thermoplastic aligners, including the ability to customize thickness for specific locations, precision in treatment, and adaptability to various cases. These factors contribute to potentially shorter treatment times and enhanced patient comfort throughout the orthodontic process.

Our Competitive Advantage: Beyond the Smile

CONFIDENT SURE

Why Choose CONFIDENT SURE? The Smile that Sets Us Apart

- 
- A close-up photograph showing a pair of white, textured gloves holding a clear, curved dental aligner. The aligner is made of a transparent material with visible internal structures and is held in a way that shows its full arc. The background is a blurred blue and white, suggesting a clinical or laboratory setting.
- **Proprietary Direct Aligner Printing Technology:** Faster, cheaper, and more customizable than traditional methods.
 - **Memory Shape Materials:** Superior comfort, fit, and treatment effectiveness for diverse patient needs.
 - **Strong Intellectual Property:** Protected technology ensures a sustainable competitive edge.
 - **Comprehensive Digital Dentistry Services:** Offering a wider range of solutions than most competitors.

The Market Opportunity: A Booming Smile Revolution
